

Chairplan Office Chair Buyer's Checklist

Helping you choose the right office chair for comfort, productivity, and style.

Choosing the right office chair is more than just a matter of style – it is about ensuring the wellbeing of your employees and creating an environment that supports focus, comfort, and productivity. At Chairplan, we understand that every office space has unique requirements. That's why our chairs are designed with a careful balance of ergonomics, adjustability, and durability, ensuring long-term value for businesses of all sizes.

Ergonomics

Ergonomics is the foundation of a good office chair. A well-designed chair supports the natural curve of the spine, reduces strain on the back and shoulders, and helps prevent fatigue. Chairplan chairs are built with supportive lumbar design and comfortable proportions to keep you sitting well throughout the day.

Adjustability

No two people sit the same way, which is why adjustability is essential. From seat height and tilt functions to armrest movement, our chairs can be fine-tuned to suit each user. This flexibility promotes healthier posture and accommodates a wide range of working preferences.

Comfort & Materials

Comfort comes from both smart design and the quality of materials. Our chairs use breathable fabrics, resilient cushioning, and finishes that bring style as well as durability. This means you don't have to choose between looking good and feeling good.

Durability & Quality

Chairplan chairs are built to last. Manufactured in the UK, each product undergoes rigorous testing to ensure it meets industry standards. With sturdy frames, high-quality mechanisms, and smooth-rolling casters, our chairs are designed for busy office environments and long-term use.

Practical Considerations

When choosing an office chair, practical details make the difference. Consider your budget, the lifespan of the chair, the weight capacity, and how easy it is to maintain. Chairplan's range is designed with these considerations in mind, ensuring the right fit for every office setup.

Extra Features (Optional)

Beyond the essentials, extra features can enhance the office experience. Options such as headrests, swivel functions, and modular configurations allow you to tailor seating to specific spaces – whether in meeting rooms, receptions, or collaborative zones. We also offer eco-conscious materials and fabric swatches to align with your sustainability goals.

Craftmanship and Quality

Chairplan champions British-made quality with all design, production, and assembly completed in-house at our Hertfordshire facility. From CNC cutting and sustainable upholstery to final ergonomic checks, every chair is made to order under one roof. This ensures bespoke solutions, faster lead times, ethical sourcing, and uncompromising quality for clients across the UK.

Sustainability

Chairplan demonstrates its commitment to sustainability and integrity through using wood sourced from FSC-certified suppliers, and ethical sourcing, with all products manufactured locally to support UK jobs — a standard of trust already recognised by many public sector organisations.

About Chairplan

Chairplan is a UK-based, family-run business dedicated to designing and manufacturing high-quality office seating. With decades of expertise, we combine craftsmanship, comfort, and modern design to deliver chairs that perform in every environment – from receptions to breakout areas, meeting rooms to home offices.

All wood used in our products is from an FSC Accredited Source
